*"These, then, are the human genitals. Considering their great delicacy, complexity and sensitivity, one might imagine that an intelligent species like man would leave them alone. Sadly this has never been the case. For thousands of years, in many different cultures, the genitals have fallen victim to an amazing variety of mutilations and restrictions. For organs that are capable of giving us an immense amount of pleasure, they have been given an inordinate amount of pain."*

*“Few are willing to brave the disapproval of their fellows, the censure of their colleagues, the wrath of their society. Moral courage is a rarer commodity than bravery in battle or great intelligence. Yet, it is the one essential quality for those who seek to change a world that yields most painfully to change.”*
